

Section A - Enrollment and Demographics

Examine the enrollment and demographic data in Section A of the datasheet.

- 1. Is your program's enrollment increasing, decreasing, or remaining constant?

 Decreasing
- Describe the reason(s) for the trend in your program's enrollment (600 characters max).
 When the state scaled back fiscal funding to the college, the kinesiology department experienced a large amount of cuts. These cuts included loss of classes, faculty, and general funding. The program has lost roughly 800 hours of classes and activity time over the last couple years. Along with the state cuts, the federal financial aid office has mandated the number of times a student can take a kinesiology activity course.
 Are the demographics of students in your program similar to those of the College, as a whole? Yes
 If no, please describe why they differ (600 characters max).
- 5. Are you able to increase your program's enrollment and/or enroll more students from underrepresented groups?

Yes

Section B - Course Success Rate Examine your program's course success rate data in Section B of the datasheet. To satisfy an accreditation requirement, the College has set a standard of 66.7% for the course success rate that all programs are expected to meet. 1. Was your program's course success rate in 2014 higher than the college standard of 66.7%? Yes 2. Was your program's course success rate in 2014 higher than the overall college success rate? No 3. Is your program's course success rate increasing, decreasing, or remaining constant? Increasing 4. Are there gaps between demographic groups (ethnicity, gender) in your program's course success rate? No 5. Briefly describe the reason(s) for the trend in your program's course success rate, and for any gaps between demographic groups (600 characters max). 6. Are you able to increase your program's course success rate and/or close gaps between demographic groups? Yes If yes, please create an initiative in Section H that describes how your program will do this, and what resources; if any, are necessary to achieve it.	6.	If no, please describe why your program is unable to do this. (600 characters max).
Examine your program's course success rate data in Section B of the datasheet. To satisfy an accreditation requirement, the College has set a standard of 66.7% for the course success rate that all programs are expected to meet. 1. Was your program's course success rate in 2014 higher than the college standard of 66.7%? Yes 2. Was your program's course success rate in 2014 higher than the overall college success rate? No 3. Is your program's course success rate increasing, decreasing, or remaining constant? Increasing 4. Are there gaps between demographic groups (ethnicity, gender) in your program's course success rate? No 5. Briefly describe the reason(s) for the trend in your program's course success rate, and for any gaps between demographic groups (600 characters max).

7	7. If no, why not? (600 characters max)
L	
Secti	on C - Productivity
	nine your program's productivity data in Section C of the datasheet. The college has set an overall
	uctivity standard of 525.
1	Was your program's productivity in 2014 higher, lower, or equal to the overall college standard of 525?
	Lower
2	. Is your program's productivity increasing, decreasing, or remaining constant?
	Decreasing
3	Is your program's course fill rate increasing, decreasing, or remaining constant?
1	Increasing Priofly describe the reasons for the trends in your program's productivity and source fill rate
4	 Briefly describe the reasons for the trends in your program's productivity and course fill rate (600 characters max).
	Due to the size and limited space of the facilities the size of the class is directly affected. The number
	of students alotted for the class is usually higher than what the facility can actually hold in a safe manner. This puts a strain on students when trying to meet the hour requirements for the class.
	Furthermore, with the facilities hours being cut, students have a harder time being productive in a
	safe enviroment.

5. Are you able to increase your productivity and/or course fill rate? Yes

6.	If no, why not? (600 characters max)
ctio	n D - Degrees and Certificates Awarded
1.	Does your program offer a degree or certificate of achievement?
	Yes
	If yes, please examine the degree and certificate data on Section D of the datasheet and answer
	the questions below. If no, skip to Section E.
	To satisfy an accreditation requirement, the college has set a standard to award a minimum of
	1,178 degrees and certificates each year.
2.	Briefly describe the trend in the number of degrees and certificates that your program has
۷.	awarded over the last five years (600 characters max).
I	n 2014, for the first time, the kinesiology department officially offered a associates degree. This
	legree is transferable to both of the California college systems. In the first year of the degree we had
	ix students graduate. We expect to see this number rise over the next several years. The kinesiology
C	lepartment will continue to review trends and graduation rates over the next five years.

be placed on possible discontinuance.

Programs that have awarded fewer than 15 degrees and certificates over the past five years may

3. Has your program awarded fewer than 15 total degrees and certificates over the past five years? Yes

4. If yes, please describe the reason(s) why your program has awarded fewer than 15 total degrees and certificates (600 characters max). Also please create an initiative in Section H that describes how your program will increase the number of degrees/certificates awarded, and what resources, if any, are necessary to achieve it.

As previously stated, the kinesiology department has only awarded six degrees. This number is low because the degree has only been offered since 2014. The kinesiology degree has a requirement of
62 units for compeletion. This means students will need roughly two years to complete the program.
As we continue over the next 2-3 years the number of degrees awarded will increase.

- Are there gaps between demographic groups (ethnicity, gender) in your program's awarding of degrees and certificates?Yes
- 6. If yes, please describe the reasons for any gaps between demographic groups (600 characters max).

When reviewing the charts we have found that with the program starting up in 2014, and a limited amount of degrees awarded it is unsufficient data. As the degree program continues to evolve and grow we will have more accurate data to analyze.

7. Are you able to increase the number of degrees/certificates that your program awards each year and/or close any gaps between demographic groups? Yes

ent Learning Outcomes

(600 characters max) e new courses that are scheduled to be assessed Fall 2015 and Spring 201 ercentage of your program's courses have assessed at least half of their Sou made any changes to courses based on the results of SLO assessment? oriefly describe the changes were made and the impact they had on stude

6. How many courses have assessed SLO's, implemented a change, and then re-assessed the SLO's (i.e. "closed the loop")?

000 Courses

- 7. How closely have you adhered to your SLO rotational plan? Mostly
- 8. Did anything impede your ability to adhere to your SLO rotational plan? (600 characters max)

According to our rotational plan most of our couses began their assessments in 2015 to align with the ISLO cycle. Initiatives were writen for most courses and 'closing the loop' will begin in Spring 2016.

9. How does your program facilitate the achievement of the college's institutional learning outcomes? (600 characters max)

The kinesiology department works very hard to help facilitate students on a daily basis. Communication is used on daily basis when interacting with not only instructors, but other students as well. As part of the kinesiology SLO's students are asked to research topics, analyze data, and report. Students will also set personal goals, evaluate, and re-assess those goals. Students are also asked to complete a personal fitness program including physical activity along with personal wellness techniques. The majority of our course map to ISLO #5 which will be assessed in 2017.

- 10. How many department/program meetings have you held in the previous year in which SLO's have been discussed?6
- 11. Are you able to improve the student learning outcomes for your program (i.e. number of SLO's assessed, adherence to rotational plan, student SLO attainment, etc.)?

 No

12. If no, why not? (600 characters max)

The department will re-evaluate when the 'loop' is closed.

Section F - Budget

- Have there been any significant changes in your program's budget over the past 3 years?
 Yes
- 2. How have these changes impacted student learning? (600 characters max)

The budget cuts have affected the kinesiology department in several ways. When the budget cuts occurred we previously stated that roughly 800 hours were cut from the department. This cut has led to larger class sizes, which in turn leads to a higher student to teacher ratio. When the ratio is higher the personal education is decreased which is not ideal for activity classes. The facilities are also out of date. With kinesiology and activity based learning constantly changing proper equipment is not only essential for proper education, but safety as well.

Educational Master Plan Goals

Goal 1: Continuously improve educational programs and services to meet student, community, and workforce development needs.

Goal 2: Provide students with information and access to diverse and comprehensive support services that lead to their success.

Goal 3: Partner with local and regional organizations to achieve mutual goals and strengthen the College, the community and the area's economic vitality.

Goal 4: Continuously enhance institutional operations and effectiveness.

Goal 5: Implement the Ventura College East Campus Educational Plan.

<u>Section I – Process Assessment</u>

How have the changes in the program review process this year worked for your area?

How would you improve the program review process based on this experience?

Appeals

After the program review process is complete, your program has the right to appeal the ranking of initiatives (i.e. initiatives that should have been ranked high but were not, initiatives that were ranked high but should not have been), the division's decision to support/not support program discontinuance, or the process (either within the department/program or the division) itself.

If you choose to appeal, please complete the Appeals form (Appendix E) that explains and supports your position. Forms are located at the Program Review VC website.

The appeal will be handled at the next higher level of the program review process.

Section I – Submission Verification
Preparer:
Dates met (include email discussions):
List of Faculty who participated in the program Review Process:
Preparer Verification:
I verify that this program document was completed in accordance with the program review process.
Dean Verification:
\square I verify that I have reviewed this program review document and find it complete. <i>The dean may also provide comments (optional):</i>

APPEAL FORM

The program review appeals process is available to any faculty, staff, or administrator who feels strongly that the prioritization of initiatives (i.e. initiatives that were not ranked high but should have been, initiatives that were ranked high but should not have been), the decision to support or not support program discontinuance, or the process followed by the division should be reviewed by the College Planning Council.
