Institutional Student Learning Outcomes will be assessed by all courses. Areas without a degree or certificate will map only to ISLOs. Each such course will map to and assess at least one ISLO. ISLOs will be assessed on a five-year cycle to allow time for assessment and faculty forums to develop and implement institution level initiatives.

**Program (PSLO)**
Program Level Student Learning Outcomes will be assessed by those areas offering a degree or certificate. All courses included in the degree or certificate that Master the PSLO will perform the assessment. All PSLOs will be assessed within the five-year cycle on a schedule determined by the program.

**Course (CSLO)**
Course Level Student Learning Outcomes will be assessed by all areas. All CSLOs for each course will be assessed during the five-year cycle. Individual disciplines can determine how to most effectively do this (e.g. save labor by embedding - assessing CSLOs at the same time as PSLOs or ISLOs when they can be assessed using the same assessment tool.)

**Service Unit (SUO)**
All Service Unit Outcomes will be assessed within the five-year cycle on a schedule determined by the service area.
