## - SUMMARY

## - Introduction

The VC Math Center, located in room SCl-223A in the Sciences and Mathematics building, is funded through the college's Title V Velocidad Grant. The Math Center assists Ventura College students in acquiring the skills they need to succeed in their current mathematics class/es.

This report examines tutoring sessions provided during fall 2015. Data for the study were extracted from GradesFirst (Math Center visits) and the VCCCD Banner System (final grades).

## - SUCCESS RATE COMPARISONS

This table compares the course success rates of tutored students to those of non-tutored students in courses where 15 or more students received tutoring. The non-tutored students were enrolled in the same course sections as the tutored students. In all courses below, students who received tutoring had higher success rates than the non-tutored students.
