# Chemistry Program Review 

2011-2012

## 1. Program Description

## A. Description

A comprehensive set of undergraduate courses fulfill the general education and transfer requirements of students through onsite as well as hybrid (online/onsite) offerings. Students may obtain an AA or AS in chemistry; both major requirements optimize preparation for advanced degrees in chemistry at fouryear institutions. A background in chemistry is essential for many high-paying, challenging careers. Opportunities await the chemist in such fields as medicine and pharmaceuticals, metals and polymers, petroleum, electrochemistry, nanotechnology, forensics, aerospace, paper, food technology, business, and education.

## B. Program Student Learning Outcomes

Successful graduates of the program are able to:

1. Apply the Scientific Method to analyze and interpret data in order to draw valid conclusions.
2. Communicate scientific ideas effectively in a logical and understandable manner, both verbally and in writing.
3. Relates observable macroscopic properties to underlying microscopic principles.
4. Demonstrates proficiency in current chemical laboratory safety and skills.

## C. College Level Student learning Outcomes

1. Critical Thinking and Problem Solving
2. Communication
3. Information Competency

Estimated Costs (Two-Year Degree)

| Enrollment Fees |  |

| Total |  |

## Criteria Used for Admission

Students must meet prerequisites for individual courses.

## Vision

Ventura College will be a model community college known for enhancing the lives and economic futures of its students and the community.

## Mission

Ventura College, one of the oldest comprehensive community colleges in California, provides a positive and accessible learning environment that is responsive to the needs of a highly diverse student body through a varied selection of disciplines, learning approaches and teaching methods including traditional classroom instruction, distance education, experiential learning, and co-curricular activities. It offers courses in basic skills; programs for students seeking an associate degree, certificate or license for job placement and advancement; curricula for students planning to transfer; and training programs to meet worker and employee needs. It is a leader in providing instruction and support for students with

## Chemistry Program Review

2011-2012
disabilities. With its commitment to workforce development in support of the State and region's economic viability, Ventura College takes pride in creating transfer, career technical and continuing education opportunities that promote success, develop students to their full potential, create lifelong learners, enhance personal growth and life enrichment and foster positive values for successful living and membership in a multicultural society. The College is committed to continual assessment of learning outcomes in order to maintain high quality courses and programs. Originally landscaped to be an arboretum, the College has a beautiful, park-like campus that serves as a vital community resource.

## Core Commitments

Ventura College is dedicated to following a set of enduring Core Commitments that shall guide it through changing times and give rise to its Vision, Mission and Goals.

- Student Success
- Respect
- Integrity
- Quality
- Collegiality
- Access
- Innovation
- Diversity
- Service
- Collaboration
- Sustainability
- Continuous Improvement

## Degrees/Certificates

## History/Significant Unit Events

Two new chemistry professors have been hired to replace attrition over the last three years maintaining four full-time instructors and averaging five part-time instructors. The program has been the beneficiary of a STEM grant that provided high-technology analytical equipment used in General Chemistry and Organic Chemistry including; infrared spectrophotometer, two gas chromatographs, and atomic absorption spectrometer from program review. This instrumentation allows analysis of a wide-range of chemical compounds using the latest techniques. The chemistry program has surpassed the district 525 goal in FY11 by efficient scheduling and has success and retention rates above the college averages.

## Organizational Structure

President: Robin Calote
Executive Vice President: Ramiro Sanchez
Dean: David Oliver
Instructors and Staff
Department Chair: Joe Selzler

# Chemistry Program Review 

2011-2012

## 2. Performance Expectations

## Program Student Learning Outcomes

Successful graduates of the program are able to:

1. Apply the Scientific Method to analyze and interpret data in order to draw valid conclusions.
2. Communicate scientific ideas effectively in a logical and understandable manner, both verbally and in writing.
3. Relates observable macroscopic properties to underlying microscopic principles.
4. Demonstrates proficiency in current chemical laboratory safety and skills.

## Student Success Outcomes

1. The program will maintain its retention rate at the average of the program's prior three-year retention rate. The retention rate is the number of students who finish a term with any grade other than W or DR divided by the number of students at census.
2. The program will continue to exceed the college's three-year average retention rate. The retention rate is the number of students who finish a term with any grade other than W or DR divided by the number of students at census.
3. The program will maintain the student success rates at the average of the program's prior three-year success rates. The student success rate is the percentage of students who receive a grade of $c$ or better.
4. The program will exceed the college's three-year average student success rates. The student success rate is the percentage of students who receive a grade of $C$ or better.

## Program Operating Outcomes

1. The program will maintain WSCH/FTEF above the 525 goal set by the district.
2. Inventory of instructional equipment is functional, current, and otherwise adequate to maintain a quality-learning environment. Inventory of all equipment over $\$ 200$ will be maintained and a replacement schedule will be developed. Service contracts for equipment over \$5,000 will be budgeted if funds are available.
3. The Chemistry Program will continue to improve its curriculum and learning environment. The program should review curriculum and assess equipment needs including maintenance, to assure that student needs are being met.
4. The program will increase the full-time to part-time FTEF ratio of two-to-one or greater, approaching three-to-one goal of AB1725.

## Chemistry Program Review

2011-2012

## D.Courses to Student Learning Outcomes Map

1. Apply the Scientific Method to analyze and interpret data in order to draw valid conclusions.
2. Communicate scientific ideas effectively in a logical and understandable manner, both verbally and in writing.
3. Relates observable macroscopic properties to underlying microscopic principles.
4. Demonstrates proficiency in current chemical laboratory safety and skills.

# Chemistry Program Review 

2011-2012

## 3. Operating Information

## A1: Budget Summary Table

To simplify the reporting and analysis of the Banner budget detail report, the budget accounts were consolidated into nine expense categories. The personnel categories include employee payroll expenses (benefits). The " 3 Year Average" was computed to provide a trend benchmark to compare the prior three year expenses to the FY11 expenses. The "FY11 College" expense percentages are included to provide a benchmark to compare the program's expenses to the overall college expenses.

| Category | Title | FY08 | FY09 | FY10 | 3 Year <br> Average | FY11 | FY11 <br> Program | FY11 <br> College |
| :---: | :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| $\mathbf{1}$ | FT Faculty | 350,285 | 347,413 | 403,564 | 367,087 | 412,879 | $\mathbf{1 2 \%}$ | $12 \%$ |
| $\mathbf{2}$ | PT Faculty | 248,322 | 274,635 | 243,071 | 255,343 | 258,597 | $1 \%$ | $-10 \%$ |
| $\mathbf{3}$ | Classified | 99,028 | 104,474 | 105,505 | 103,002 | 105,984 | $3 \%$ | $-1 \%$ |

| $\mathbf{9}$ | Equipment | 19,812 | 32,753 | 7,320 | 19,962 | 14,154 | $-29 \%$ | $\mathbf{2 4 \%}$ |
|  | Total | $\mathbf{7 3 4 , 7 2 7}$ | $\mathbf{7 7 5 , 9 1 6}$ | $\mathbf{7 8 6 , 8 5 5}$ | $\mathbf{7 6 5 , 8 3 3}$ | $\mathbf{8 1 8 , 4 4 3}$ | $\mathbf{7 \%}$ | $\mathbf{0 \%}$ |

## A2: Budget Summary Chart

This chart illustrates the program's expense trends. The data label identifies the FY11 expenses (the last bar in each group). The second-to-last bar is the program's prior three year average.

## Chemistry Program Review

2011-2012

## A3: Comparative Budget Changes Chart

This chart illustrates the percentage change from the prior three year average expense to the FY11 expenses. The top bar for each budget category represents the program's change in expenses and includes the data label. The second bar represents the college's change in expenses.

## A4: Budget Detail Report

The program's detail budget information is available in Appendix A - Program Review Budget Report. This report is a PDF document and is searchable. The budget information was extracted from the District's Banner Financial System. The program budget includes all expenses associated to the program's Banner program codes within the following funds: general fund (111), designated college equipment fund (114-35012), State supplies and equipment funds ( 128 xx ), and the technology refresh fund (445). The Program Review Budget Report is sorted by program (in alphabetical order) and includes the following sections: total program expenses summary; subtotal program expenses for each different program code; detail expenses by fund, organization and account; and program inventory (as posted in Banner). To simplify the report, the Banner personnel benefit accounts (3xxx) were consolidated into employee type benefit accounts (3xxx1 = FT Faculty, 3xxx2 = PT Faculty, 3xxx3 = Classified, etc.).

## Chemistry Program Review

2011-2012

## A5: Interpretation of the Program Budget Information

The program shows a $15 \%$ increase in average FT faculty expenditures over the last three years paralleling the college average expenditures over the same period. Three factors account for this change; step and column increases, changes in release time, and increased full-time instructor loads. Increases in full-time expenditures correspond to the decrease in part-time expenditures which mirrors the college trends.

The supplies budget shows a 31\% increase over the average of the past three years; however, FY08 and FY09 supplies reported in table 3.A1 do not reflect an additional $\$ 10,000$ from the physical science account. Taking this into account, the chemistry supply budget has remained relatively constant in spite of a $10 \%$ growth in students and inflationary pressures.

Equipment expenditures were markedly less in FY11 due to the ending of a two-year STEM grant that funded a major portion of the equipment needs in Chemistry during the years 2008-2010. In addition, consideration needs to be made for the maintenance of recently purchased equipment. The department often struggles to find funds to fix equipment when it breaks down.

Because of changes in laboratory curriculum, greater preparation time is needed, requiring greater laboratory technician assistance. Due to limited availability of unknown samples, students are unable to repeat experiments which they have not mastered. The department addresses this deficiency in one of our initiatives.

# Chemistry Program Review 

2011-2012

## B1: Program Inventory Table

This chart shows the inventory (assets) as currently posted in the Banner Financial System. This inventory list is not complete and will require review by each program. Based on this review an updated inventory list will be maintained by the college. A result of developing a complete and accurate inventory list is to provide an adequate budget for equipment maintenance and replacement (total-cost-of-ownership). The college will be working on this later this fall.

## B2: Interpretation of the Program Inventory Information

The equipment list provided by Banner is incomplete, contains numerous errors, and does not accurately reflect the program's holdings. An inventory is underway to provide an accurate equipment list. A quick survey of existing equipment shows that chemistry has nearly $\$ 500,000$ of equipment, approximately $40 \%$ of which was acquired through the STEM grant.

# Chemistry Program Review 

2011-2012

C1: Productivity Terminology Table

| Sections | A credit or non-credit class. <br> Does not include not-for-credit classes (community education). |
| :--- | :--- |
| Census | Number of students enrolled at census (typically the 4 ${ }^{\text {th }}$ week of class for fall and spring). |
| FTES | Full Time Equivalent Students <br> A student in the classroom 15 hours/week for 35 weeks (or two semesters) $=525$ <br> student contact hours. <br> 525 student contact hours $=1$ FTES. <br> Example: 400 student contact hours $=400 / 525=0.762$ FTES. <br> The State apportionment process and District allocation model both use FTES as the <br> primary funding criterion. |
|  | Full Time Equivalent Faculty <br> A faculty member teaching 15 units for two semesters ( 30 units for the year) $=1$ FTE. <br> Example: a 6 unit assignment $=6 / 30=0.20$ FTEF (annual). The college also computes <br> semester FTEF by changing the denominator to 15 units. However, in the program <br> review data, all FTE is annual. <br> FTEF includes both Full-Time Faculty and Part-Time Faculty. <br> FTEF in this program review includes faculty assigned to teach extra large sections (XL <br> Faculty). This deviates from the district practice of not including these assignments as <br> part of FTEF. However, it is necessary to account for these assignments to properly <br> produce represent faculty productivity and associated costs. |
| Cross | FTEF is assigned to all faculty teaching cross-listed sections. The FTEF assignment is <br> proportional to the number of students enrolled at census. This deviates from the <br> practice of assigning load only to the primary section. It is necessary to account for these <br> cross-listed assignments to properly represent faculty productivity and associated costs. |
| Listed |  |
| FTEF | Extra Large FTE: This is the calculated assignment for faculty assigned to extra large <br> sections (greater than 60 census enrollments).The current practice is not to assign FTE. <br> Example: if census>60, 50\% of the section FTE assignment for each additional group of <br> 25 (additional tiers). |
| XL FTE |  |

## Chemistry Program Review

2011-2012

## C2: Productivity Summary Table

This table is a summary of the detail information provided in the Program Review Productivity Report. The "3 Year Average" was computed to provide a trend benchmark to compare the results of the prior three years to the FY11 results. The "FY11 College" percentages are included to provide a benchmark to compare the program's percentages.

| Title | FY08 | FY09 | FY10 | 3 Year <br> Average | FY11 | Program <br> Change | College <br> Change |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| Sections | 73 | 74 | 75 | 74 | 76 | $3 \%$ | $-13 \%$ |
| Census | 2,362 | 2,653 | 2,781 | 2,599 | 2,852 | $10 \%$ | $-2 \%$ |
| FTES | 305 | 340 | 360 | 335 | 373 | $11 \%$ | $-1 \%$ |
| FT Faculty | 3.73 | 2.96 | 4.27 | 3.65 | 4.12 | $13 \%$ | $5 \%$ |
| PT Faculty | 4.22 | 4.75 | 3.90 | 4.29 | 4.35 | $1 \%$ | $-12 \%$ |
| XL Faculty | 0.73 | 1.17 | 1.08 | 0.99 | 0.97 | $-3 \%$ | $29 \%$ |
| Total Faculty | 8.69 | 8.88 | 9.25 | 8.94 | 9.43 | $6 \%$ | $2 \%$ |
| WSCH | 526 | 574 | 584 | 562 | 593 | $6 \%$ | $-2 \%$ |

## C3: Comparative Productivity Changes Chart

This chart illustrates the percentage change from the prior three year average productivity to the FY11 productivity. The top bar for each budget category represents the program's change in productivity and includes the data label. The second bar represents the college's change in productivity.

## Chemistry Program Review

2011-2012

C4: Interpretation of the Program Productivity Information
The C2 Chart and the C3 Graph indicate that the program offerings have remained relatively constant over the prior three years average while the number of sections offered by the college has decreased by $13 \%$ over the same period. The WSCH/FTEF ratio has been trending upward since FYO8 and is currently at 593, which is above the district goal of 525. Student enrollment continues to be strong with a $10 \%$ increase even though the number of sections has remained relatively consistent.

## Chemistry Program Review

## D1: District WSCH Ratio Productivity Table

This table shows the District WSCH ratio (WSCH/FTEF) for each course by year for this program. Courses not offered during FY11 (last year) or without faculty load (independent study) are excluded. Because these are ratios, the combined average is computed using total WSCH and total FTEF (not the average of ratios). The formula used in this table distributes FTEF to all cross-listed sections (proportional to census enrollment) but does not include the associated faculty costs of extra large assignment. District WSCH Ratio = WSCH / (PT FTE + FT FTE).

| District WSCH Ratio: Weekly Student Contact Hours/(FT FTE+PT FTE) |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

2011-2012

## D2: District WSCH Ratio Productivity Chart

This chart illustrates the course level District WSCH ratio. The top bar shows the program's three year average. The second bar shows the program's FY11 WSCH ratio. The axis represents the District WSCH ratio goal set in 2006. The program's (or subject's) total WSCH ratio is shown as the TOTAL at the bottom of the chart.

## Chemistry Program Review

## 2011-2012

## D3: College WSCH Ratio Productivity Table

This table shows the College's WSCH ratio (WSCH/FTEF) for each course by year for the program. Courses not offered during FY11 (last year) or without faculty load (independent study) are excluded. Because these are ratios, the combined average is computed using total WSCH and total FTEF (not the average of ratios). The formula used in this table includes the associated faculty costs of extra large sections. Faculty teaching extra large sections are paid stipends equal to $50 \%$ of their section FTE assignment for each group of 25 students beyond the first 60 students (calculated in this table as XL FTE). This College WSCH Ratio is a more valid representation of WSCH productivity. The College WSCH Ratio will be used in the program review process. College WSCH Ratio = WSCH / (PT FTE + FT FTE + XL FTE)

| College WSCH Ratio: Weekly Student Contact Hours/(FT FTE + PT FTE + XL FTE) |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Course | Title | FY08 | FY09 | FY10 | 3 Yr Avg | FY11 | Change | Dist Goal | \% Goal |
| CHEMV01A | General Chemistry I | 754 | 729 | 735 | 739 | 781 | 6\% | 525 | 149\% |
| CHEMV01AL | General Chemistry I Lab | 462 | 492 | 507 | 487 | 512 | 5\% | 525 | 97\% |
| CHEMV01B | General Chemistry II | 580 | 604 | 729 | 641 | 754 | 18\% | 525 | 144\% |
| CHEMV01BL | General Chemistry II Lab | 337 | 415 | 490 | 414 | 457 | 10\% | 525 | 87\% |
| CHEMV12A | General Organic Chemistry I | 465 | 450 | 750 | 555 | 735 | 32\% | 525 | 140\% |
| CHEMV12AL | Gen Organic Chemistry I Lab | 270 | 560 | 460 | 404 | 450 | 11\% | 525 | 86\% |
| CHEMV12B | General Organic Chemistry II | 315 | 420 | 480 | 405 | 510 | 26\% | 525 | 97\% |
| CHEMV12BL | Gen Organic Chemistry II Lab | 440 | 460 | 310 | 380 | 320 | -16\% | 525 | 61\% |

## Chemistry Program Review

2011-2012

D4: College WSCH Ratio Productivity Chart
This chart illustrates the course level College WSCH ratio. The top bar shows the program's three year average. The second bar shows the FY11 WSCH ratio. The axis represents the District WSCH ratio goal set in 2006. The program's (or subject's) total WSCH ratio is shown as the TOTAL at the bottom of the chart. The computation used for the College WSCH Ratio includes XL FTE (extra-large sections) and the assignment of FTEF to all cross-listed sections (proportional to census enrollment).

## D5: Productivity Detail Report

The program's detail productivity information is available in Appendix B - Program Review Productivity Report. This report is a PDF document and is searchable. The productivity information was extracted from the District's Banner Student System. The productivity information includes all information associated with the program's subject codes. The Program Review Productivity Report is sorted by subject code (alphabetical order) and includes the following sections: productivity measures and WSCH ratios by course by year.

## Chemistry Program Review

2011-2012

## D6: Interpretation of the Program Course Productivity Information

The D2 Chart shows mixed WSCH/FTEF ratios with the average at 593, which is above the district 525 goal. Considering the laboratory size is limited to 24 students due to safety concerns, this is a remarkable efficiency, surpassing the efficiencies from the Chemistry Departments at Oxnard and Moorpark Colleges.

CHEMV12A and CHEMV12B are high demand courses; class sizes are smaller than entry level courses being a second year level. CHEM V12B enrollment has expanded by $26 \%$ over the average of the prior three years. Inefficiencies are noted for CHEM V12BL due to attrition from Chem V12A and V12AL, yet CHEMV12BL maintains over the 15 student minimum required to offer a course.

# Chemistry Program Review 

2011-2012

## E1: Student Success Terminology

| Census | Number of students enrolled at Census (typically the $4^{\text {th }}$ week of class for fall and <br> spring). Census enrollment is used to compute WSCH and FTES for funding purposes. |
| :--- | :--- |
| Retain | Students completing the class with any grade other than W or DR divided by Census <br> Example: 40 students enrolled, 5 students dropped prior to census, 35 students were <br> enrolled at census, 25 students completed the class with a grade other than W or DR: <br> Retention Rate $=25 / 35=71 \%$ |
| Success | Students completing the class with grades A, B, C, CR or P divided by Census <br> Excludes students with grades D, F, or NC. |

## E2: Student Success Summary

The following two tables summarize the detail information provided in the Appendix C - Program Review Student Success Report. The first table shows the number of students. The second table shows the percentage of students. Both tables show the distribution of student grades by year for the program (subject). They show the number of students who were counted at census, completed the class (retention), and were successful. The " 3 Year Average" was computed to provide a trend benchmark to compare the prior three year expenses to the FY11 success measures. The "College" success percentages are included to compare the results of the program to the results of the college.

| Subject | Fiscal Year | A | B | C | P/CR | D | F | W | NC | Census | Retain | Success |
| :--- | :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| CHEM | FY08 | 703 | 535 | 355 | - | 149 | 190 | 369 | - | 2,303 | 1,932 | 1,593 |
| CHEM | FY09 | 830 | 585 | 419 | 3 | 128 | 200 | 408 | 2 | 2,578 | 2,165 | 1,837 |
| CHEM | FY10 | 911 | 604 | 386 | 3 | 161 | 204 | 448 | - | 2,717 | 2,269 | 1,904 |
| CHEM | 3 Year Avg | 815 | 575 | 387 | 2 | 146 | 198 | 408 | 1 | 2,533 | 2,122 | 1,778 |
| CHEM | FY11 | 973 | 658 | 425 | - | 156 | 211 | 367 | 8 | 2,798 | 2,431 | 2,056 |

| Subject | Fiscal Year | A | B | C | P/CR | D | F | W | NC | Census | Retain | Success |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| CHEM | FY08 | 31\% | 23\% | 15\% | 0\% | 6\% | 8\% | 16\% | 0\% |  | 84\% | 69\% |
| CHEM | FY09 | 32\% | 23\% | 16\% | 0\% | 5\% | 8\% | 16\% | 0\% |  | 84\% | 71\% |
| CHEM | FY10 | 34\% | 22\% | 14\% | 0\% | 6\% | 8\% | 16\% | 0\% |  | 84\% | 70\% |
| CHEM | 3 Year Avg | 32\% | 23\% | 15\% | 0\% | 6\% | 8\% | 16\% | 0\% |  | 84\% | 70\% |
| CHEM | FY11 | 35\% | 24\% | 15\% | 0\% | 6\% | 8\% | 13\% | 0\% |  | 87\% | 73\% |
| College | 3 Year Avg | 33\% | 19\% | 12\% | 5\% | 5\% | 10\% | 15\% | 2\% |  | 85\% | 68\% |
| College | FY11 | 33\% | 20\% | 13\% | 3\% | 5\% | 10\% | 14\% | 2\% |  | 86\% | 70\% |

## E3: Retention and Success Rates

This chart illustrates the retention and success rates of students who were counted at census. Each measure has four bars. The first bar represents the program's prior three year average percent. The second bar shows last year's (FY11) percent. The third and fourth bars represent the overall college percents.

## Chemistry Program Review

2011-2012

## E4: Grade Distribution

This chart illustrates the program's distribution of grades (by subject). Each grade has four bars. The first bar represents the program's prior three year average percent of grades. The second bar shows last year's (FY11) grade distribution percents. The third and fourth bars represent the overall college distribution percents.

## E5: Student Success Detail Report

The program student success detail information is available in Appendix C - Program Review Student Success Report. This report is a PDF document and is searchable. The student success information was extracted from the District's Banner Student System. The student success information includes all information associated with the program's subject codes. The Program Review Student Success Report is sorted by subject code (alphabetical order) and includes the following sections: comparative summary and course detail by term. The following table defines the terminology.

## Chemistry Program Review

2011-2012

## E6: Interpretation of Program Retention, Student Success, and Grade Distribution

Student success and retention rates in Chemistry are slightly higher than the prior three year average of the program and the college, which is remarkable considering the academic rigor of the department's course offerings. The increase in retention and success rates may be partially attributed to the enforcement of prerequisites.

Grade distributions mirror those of the college with $35 \%$ of the students receiving A's and 24\% of successful students receiving B's. Preliminary analysis shows that there is not consistency between laboratory grading polices among instructors. The department intends to address this by establishing a more standardized assessment of student achievement.

Lab grades are generally higher than lecture grades due to the cooperative learning environment which may also be responsible for skewing the grade distribution.

## Chemistry Program Review

2011-2012

## G2: Student Demographics Chart

This chart illustrates the program's percentages of students by ethnic group. . Each group has four bars. The first bar represents the program's prior three year percent. The second bar shows last year's (FY11) percent. The third and fourth bars represent the overall college percents.

## G3: Student Demographics Detail Report

The program student success detail information is available in Appendix D - Program Review Student Demographics Report. This report is a PDF document and is searchable. The student success information was extracted from the District's Banner Student System. The student demographic information includes all information associated with the program's subject codes. The Program Review Student Demographics Report is sorted by subject code (alphabetical order) and includes the following sections: comparative summary by year, and detail demographics by term and course.

## G4: Interpretation of the Program Demographic Information

The ethnic and gender distribution in Chemistry has remained relative constant over the past three years and roughly mirrors the college as a whole. Given the historical underrepresentation of women in chemistry, we continue to experience growth in our female demographic. In fact, the department has a

## Chemistry Program Review

2011-2012
higher percentage of women than the college as a whole. There also has been a large increase in the number of Hispanic students served, although the percent of enrollment has remained slightly below the college average.

# Chemistry Program Review 

2011-2012

## 4. Performance Assessment

A1: Program-Level Student Learning Outcomes

| Program-Level Student Learning Outcome 1 | Performance Indicators |  |  |
| :--- | :--- | :---: | :---: |
| Apply the Scientific Method to analyze and <br> interpret data in order to draw valid <br> conclusions. | Students will formulate and test hypotheses using <br> guided experimentation using modern analytical <br> equipment, collect and analyze data, and <br> demonstrate mastery by comparison of their <br> conclusions to acceptable metrics. 80\% of the <br> students enrolled in Chem 1B and higher-level <br> courses will achieve mastery. |  |  |
| Operating Information |  |  |  |

In CHEM 1B, $83 \%$ of the students were able to apply the scientific method to evaluate a chemical reaction system to determine how chemical equilibria will be altered by changes in temperature, concentration or pressure by applying LeChatelier's principle. Other courses in the program are to be evaluated in the future after development of appropriate rubrics for measuring this program-level SLO.

## Analysis - Assessment

In the one course evaluated, students met the performance goal. More data is needed in CHEM 1B and organic chemistry lab courses. Equipment in the organic chemistry labs needs to be updated to allow proper collection and analysis of data.

| Program-Level Student Learning Outcome 2 | Performance Indicators |  |
| :--- | :--- | :---: |
| Communicate scientific ideas effectively in a <br> logical and understandable manner, both <br> verbally and in writing. | Laboratory reports are collected weekly and <br> evaluated using rubrics to assess student's ability to <br> communicate scientific concepts. In addition, <br> students are asked to verbally communicate <br> scientific ideas both formally and informally during <br> lab. In lecture, homework and tests are used to <br> measure students' ability to effectively <br> communicate scientific ideas. 80\% of the students <br> will achieve mastery. |  |
| Operating Information |  |  |
| Insufficient data is available to assess this PLSLO. |  |  |
| Data relating to this SLO has been collected, but further analysis of this data will be required. Additional data |  |  |

## Chemistry Program Review

2011-2012
will need to be gathered and interpreted due to variations in instructor data collection methodologies.

## Chemistry Program Review

2011-2012

| Program-Level Student Learning Outcome 3 |
| :--- | | Demonstrates proficiency in current chemical <br> laboratory safety and skills. |  |  |
| :--- | :---: | :---: |
| A safety lecture and corresponding contract is given <br> at the beginning of the semester to ensure that <br> students have the required knowledge. Students <br> are continually monitored during lab to ensure safe <br> laboratory practices are followed. Students are <br> asked questions in the lab pretest to demonstrate <br> safe laboratory practices and basic laboratory skills <br> including; massing (weighing) objects, dispensing <br> measured amounts of solids and liquids, following <br> written laboratory instructions, using fume hoods, <br> making observations, and recording data. |  |  |
| Operating Information |  |  |
| Students are given a safety handout sheet and lecture demonstrating safe laboratory practices. All students <br> will demonstrate safe laboratory practices and skills throughout all laboratory courses in the program as a <br> condition of continuing in the program. |  |  |
| Safety violations or improper laboratory practices have caused very few accidents. In FY11 there were no <br> serious accidents in the chemistry program with over 1200 students enrolled. |  |  |

# Chemistry Program Review 

2011-2012

## 4B: Student Success Outcomes

## Student Success Outcome 1

The program will maintain its retention rate at the average of the program's prior threeyear retention rate. The retention rate is the number of students who finish a term with any grade other than W or DR divided by the number of students at census.

Performance Indicators
The program will maintain the retention rate at the average of the program's retention rate for the prior three years.

## Operating Information

Chemistry's prior three year average retention rate was $84 \%$. Chemistry's FY11 retention rate was 87\%. (3E2 and 3E3)

## Analysis - Assessment

In FY 11 Chemistry student retention rate was 3\% greater than the program average for the prior three years and this Student Success Outcome was met. The Chemistry department is on track with serving the needs of the students and improving student retention.

| Student Success Outcome 2 | Performance Indicators |  |
| :--- | :--- | :---: |
| The program will continue to exceed the <br> college's three-year average retention rate. <br> The retention rate is the number of students <br> who finish a term with any grade other than <br> W or DR divided by the number of students at <br> census. | The program will exceed the average of the college <br> retention rate for the prior three years. |  |
| Operating Information |  |  |
| The college prior three year average retention rate was 85\%. Chemistry's FY11 retention rate was 87\%. (3E2 <br> and 3E3) Assessment |  |  |
| Chemistry student retention rate in FY 11 was 1\% greater than the college average for the prior three years. <br> The Chemistry department is on track with serving the needs of the students and improving student <br> retention. It is likely that student retention was improved by the student support services provided by the <br> STEM grant. A variety of student support services are available including: tutoring, financial aid, and <br> instructor office hours. A STEM grant also provided support for qualifying students in STEM disciplines. <br> Extraordinary services were provided to STEM program students including a textbook lending program, <br> counseling, collaboration and research opportunities. Courses will continue to be offered at times that are <br> convenient for students. A scheduling matrix is used to prevent conflicts with single section major's classes in <br> the Math-Science division. |  |  |

## Chemistry Program Review

2011-2012

| Student Success Outcome 3 | Performance Indicators |  |  |
| :--- | :--- | :---: | :---: |
| The program will maintain the student <br> success rates at the average of the <br> program's prior three-year success rates. <br> The student success rate is the percentage <br> of students who receive a grade of C or <br> better. | The program will maintain student success rate at the <br> program's average student success rate for the prior <br> three years. |  |  |
| Operating Information |  |  |  |
| Chemistry's prior three year average student success rate was 70\%. Chemistry's FY11 retention rate was <br> 73\%. ( (3E2 and 3E3) |  |  |  |
| Analysis - Assessment |  |  |  |
| lin FY 11 the Chemistry student success rate was 3\% greater than the program average for the prior three <br> years. (See Table E2 and Graph E3) The Chemistry department is on track with serving the needs of the <br> students and improving student successs It it ikrly that student success was improved by the student <br> support services provided by the STEM grant. Tutoring is offered through the Tutoring Center for all levels of <br> chemistry. Instructors meet with students during office hours to address student concerns. |  |  |  |

| Student Success Outcome 4 | Performance Indicators |  |
| :--- | :--- | :---: |
| The program will exceed the college's <br> three-year average student success rates. <br> The student success rate is the percentage <br> of students who receive a grade of C or <br> better. | The program student success will exceed the average <br> of the colleges's student success rate for the prior <br> three years. |  |
| Operating Information |  |  |
| The college prior three year average student success rate was $68 \%$. Chemistry's FY11 retention rate was <br> 73\%. (3E2 and 3E3) |  |  |
| Analysis - Assessment |  |  |
| In FY 11, the Chemistry student success rate was 5\% greater than the college average for the prior three <br> years. This success is coupled with increasing enrollments reflects the dedication and hard work of the <br> chemistry faculty. Tutoring is offered through the Tutoring Center for all levels of chemistry. Instructors meet <br> with students during office hours to address student's academic needs for their course. |  |  |

# Chemistry Program Review 

2011-2012

## 5. Findings

## Finding 1:

Both gas chromatographs in organic chemistry laboratory are in need of service contracts and updated software. Infrared spectrophotometers, the liquid chromatographic mass spectrometer, and the atomic absorption spectrophotometer should have service contracts to avoid gaps in service. (See analysis in Program-level SLO 1 and Program Operating Outcome 4.)

## Finding 2:

Elementary Chemistry laboratory is in need of modern data gathering and analysis techniques to better prepare students for higher-level courses and transfer. Computers and data sensors would fill the gap in this area. (See analysis in Student Success Outcome 5.)

## Finding 3:

The chemistry program is exceeding 525 efficiency goal set by the district. (See Section 3 - Operating Information: D3 Table, D4 Chart, D6 Analysis, and Student Success Outcomes 1 and 2.)

## Finding 4:

The curriculum is current and is meeting the needs of the students. Retention and success rates are above the college's as a whole. See Table 3E2, Chart 3E3, and Data Interpretation E6. Grade distributions show some lack of consistency regarding expectations for student achievement especially in lower level chemistry courses.

# Chemistry Program Review 

2011-2012

## 6. Initiatives

Initiative : Improve Instrumentation in Organic Chemistry Laboratory

## Initiative ID: CHEM1-12

Links to Finding 1: In order for students to successfully synthesize and analyze compounds, it is critical that students have access to a variety of instrumentation. Currently one of our most frequently used pieces of equipment- a gas chromatograph- is often inoperable due to maintenance issues such as going out of calibration, software bugs and mechanical failures. This is significantly reducing the amount of exposure that students have to this technique and subsequently has resulted in poorer performance when this topic is covered in both the lecture and lab class SLOs'. The department has developed a plan to improve student performance on these SLOs by updating the software and increasing the frequency of maintenance of the machine.

Benefits: Improvement in student access to gas chromatography will increase students' ability to grasp the theory and application of organic compound characterization

Request for Resources: Organic Lab- GC (gas chromatography) service contract (\$2200/year) and software update to Clarity Lite (\$6000)

## Funding Sources:

Please check one or more of the following funding sources.

| No new resources are required (use existing resources) |  |
| :--- | :--- |
| Requires additional general funds for personnel, supplies or <br> services (includes maintenance contracts) | X |
| Requires computer equipment funds (hardware and software) | X |
| Requires college equipment funds (other than computer related) |  |
| Requires college facilities funds |  |
| Requires other resources (grants, etc.) |  |

## Chemistry Program Review

2011-2012

Initiative : Improve student access to technology in the Elementary Chemistry Laboratory

## Initiative ID: CHEM2-12

Links to Finding 2: In order to improve students' ability to measure chemical quantities accurately, the department has developed several strategies to aid student performance on Student Success Outcome 5. Techniques often are first demonstrated by the instructor, but often this is hard for many students to see due to the configuration of the lab room. Access to additional presentation equipment including a data projector, computer and visualizer would aid this. In addition, students would benefit from access to computer data collection sensors and the ability to analyze data using software such as Excel. Finally, the last part of the department's strategy to improve student lab technique is to allow students more opportunities to repeat unknowns. This will require more staff labor to prepare the unknowns, however, and additional staffing especially in the evening to prepare the lab rooms.

Benefits: Using modern data collection and analysis will improve students' ability to accurately see relationships between physical properties and relate observations to underlying chemical principles. Students will be able repeat lab assignments more frequently, self-correct mistakes, and improve their understanding of the practice of chemistry and its underlying principles.

## Request for Resources:

Elementary Chemistry Lab- 8 computers for student use (\$7000)
Elementary Chemistry Lab- data projector (\$1600),
Visualizer ( $\$ 1500$ ), and instructor computer ( $\$ 900$ )
Increase hours for student worker to prepare samples student samples

## Funding Sources:

Please check one or more of the following funding sources.

| No new resources are required (use existing resources) |  |
| :--- | :--- |
| Requires additional general funds for personnel, supplies or <br> services (includes maintenance contracts) | X |
| Requires computer equipment funds (hardware and software) | X |
| Requires college equipment funds (other than computer related) |  |
| Requires college facilities funds |  |
| Requires other resources (grants, etc.) |  |

## Chemistry Program Review

2011-2012

Initiative : Increase student support resources.

## Initiative ID: CHEM3-12

Links to Finding 3: Overall, in courses where the SLO was not met, the department believes that increasing access to support outside of the classroom would be very beneficial to students, especially given our large (70+ students) classes. Increased college support for the tutoring center, additional SI tutors, and the development of additional online resources for students will be pursued by the department to increase student engagement and success.

Benefits: Students would be able to achieve all SLO given the appropriate support.

## Request for Resources:

Supplemental Instructor (SI) for chemistry courses $\$ 3000 /$ semester, Increased availability of chemistry tutors \$2000/semester Two video cameras $\$ 1500$ for development of online resources
Training and support needed to help instructors develop on-line tools for students.

## Funding Sources:

Please check one or more of the following funding sources.

| No new resources are required (use existing resources) |  |
| :--- | :--- |
| Requires additional general funds for personnel, supplies or <br> services (includes maintenance contracts) | X |
| Requires computer equipment funds (hardware and software)) | X |
| Requires college equipment funds (other than computer related) | X |
| Requires college facilities funds |  |
| Requires other resources (grants, etc.) |  |

## Chemistry Program Review

2011-2012

Initiative : Increase standardization of student assessment in multi-section classes.

## Initiative ID: CHEM4-12

Links to Finding 4: Overall, the chemistry department has a grade distribution that mirrors the college as a whole. Closer analysis has shown that the grade distribution between lecture and lab courses and especially between lab sessions in inconsistent. Lecture classes average at approximately 15-25\% A's while lab classes vary from between $10 \%$ A's to more than $50 \%$ A's for example. While lab grades tend to be higher due to cooperative nature of lab classes, the large variation in grade distributions is heavy influenced by a lack of consistent grading rubrics and other metrics among instructors. The department needs to develop consistent assessment tools especially in laboratory classes.

Benefits: Students would have a similar classroom experience and have similar preparation for more advanced classes.

## Request for Resources:

None- Will be address in department meetings and flex time activities

## Funding Sources:

Please check one or more of the following funding sources.

| No new resources are required (use existing resources) |  |
| :--- | :--- |
| Requires additional general funds for personnel, supplies or <br> services (includes maintenance contracts) | X |
| Requires computer equipment funds (hardware and software)) |  |

| Requires college facilities funds |  |
| Requires other resources (grants, etc.) |  |

## 6A: Initiatives Priority Spreadsheet

The following blank tables represent Excel spreadsheets and will be substituted with a copy of the completed Excel spreadsheets. The program's initiatives will be entered into the Excel spreadsheets by resource category and consolidated into division and college-wide spreadsheets.

Personnel -Faculty Requests

| $\begin{aligned} & \pm \\ & \pm \\ & \hline \end{aligned}$ |  | $\begin{aligned} & \text { Program Priority } \\ & (0,1,2,3 \ldots) \end{aligned}$ |  |  |  |  |  |  |  |  |  | ¢ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 |  |  |  |  |  |  |  |  |  |  |  |  |
| 2 |  |  |  |  |  |  |  |  |  |  |  |  |
| 3 |  |  |  |  |  |  |  |  |  |  |  |  |
| 4 |  |  |  |  |  |  |  |  |  |  |  |  |
| 5 |  |  |  |  |  |  |  |  |  |  |  |  |

Personnel - Other Requests

|  | $\begin{aligned} & \underline{\varepsilon} \\ & \frac{\pi}{00} \\ & \underline{0} \mathbf{0} \end{aligned}$ |  |  |  |  |  |  |  |  |  |  | ¢ ¢ ¢ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 |  |  |  |  |  |  |  |  |  |  |  |  |
| 2 |  |  |  |  |  |  |  |  |  |  |  |  |
| 3 |  |  |  |  |  |  |  |  |  |  |  |  |
| 4 |  |  |  |  |  |  |  |  |  |  |  |  |
| 5 |  |  |  |  |  |  |  |  |  |  |  |  |

## Chemistry Program Review

|  | $\begin{aligned} & \underline{E} \\ & \text { Nu } \\ & \text { on } \\ & \text { o } \end{aligned}$ |  |  |  |  |  |  |  |  |  |  | ¢ $\stackrel{+}{+}$ 0 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 |  |  |  |  |  |  |  |  |  |  |  |  |
| 2 |  |  |  |  |  |  |  |  |  |  |  |  |
| 3 |  |  |  |  |  |  |  |  |  |  |  |  |
| 4 |  |  |  |  |  |  |  |  |  |  |  |  |
| 5 |  |  |  |  |  |  |  |  |  |  |  |  |

Other Equipment Requests

|  |  |  |  |  |  |  |  |  |  |  |  | ¢ ¢ ¢ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| 5 |  |  |  |  |  |  |  |  |  |  |  |  |

Facilities Requests

|  |  |  |  |  |  |  |  |  |  |  |  | - |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 |  |  |  |  |  |  |  |  |  |  |  |  |
| 2 |  |  |  |  |  |  |  |  |  |  |  |  |
| 3 |  |  |  |  |  |  |  |  |  |  |  |  |
| 4 |  |  |  |  |  |  |  |  |  |  |  |  |
| 5 |  |  |  |  |  |  |  |  |  |  |  |  |

## Other Resource Requests

|  |  |  |  |  |  |  |  |  |  |  |  | ¢ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 |  |  |  |  |  |  |  |  |  |  |  |  |
| 2 |  |  |  |  |  |  |  |  |  |  |  |  |
| 3 |  |  |  |  |  |  |  |  |  |  |  |  |
| 4 |  |  |  |  |  |  |  |  |  |  |  |  |
| 5 |  |  |  |  |  |  |  |  |  |  |  |  |

## 6B: Program Level Initiative Prioritization

All initiatives will first be prioritized by the program staff. If the initiative can be completed by the program staff and requires no new resources, then the initiative should be given a priority 0 (multiple priority 0 initiatives are allowed). All other initiatives should be given a priority number starting with 1 (only one 1 , one 2 , etc.).

## 6C: Division Level Initiative Prioritization

The program initiatives within a division will be consolidated into division spreadsheets. The dean may include additional division-wide initiatives. All initiatives (excluding the ' 0 ' program priorities) will then be prioritized using the following priority levels:

R: Required - mandated or unavoidable needs (litigation, contracts, unsafe to operate conditions, etc.).
H: High - approximately $1 / 3$ of the total division's initiatives by resource category (personnel, equipment, etc.)
M: Medium - approximately 1/3 of the total division's initiatives by resource category (personnel, equipment, etc.)
L: Low - approximately $1 / 3$ of the total division's initiatives by resource category (personnel, equipment, etc.)

## 6D: Committee Level Initiative Prioritization

The division's spreadsheets will be prioritized by the appropriate college-wide committees (staffing, technology, equipment, facilities) using the following priority levels.

R: Required - mandated or unavoidable needs (litigation, contracts, unsafe to operate conditions, etc.).
H: High - approximately $1 / 3$ of the total division's initiatives by resource category (personnel, equipment, etc.)
M: Medium - approximately 1/3 of the total division's initiatives by resource category (personnel, equipment, etc.)
L: Low - approximately $1 / 3$ of the total division's initiatives by resource category (personnel, equipment, etc.)

## Chemistry Program Review

2011-2012

## 6E: College Level Initiative Prioritization

Dean's will present the consolidated prioritized initiatives to the College Planning Council. The College Planning Council will then prioritize the initiatives using the following priority levels.

R: Required - mandated or unavoidable needs (litigation, contracts, unsafe to operate conditions, etc.).
H: High - approximately $1 / 3$ of the total division's initiatives by resource category (personnel, equipment, etc.)
M: Medium - approximately $1 / 3$ of the total division's initiatives by resource category (personnel, equipment, etc.)
L: Low - approximately $1 / 3$ of the total division's initiatives by resource category (personnel, equipment, etc.)

## Chemistry Program Review

2011-2012

## 7A: Appeals

After the program review process is complete, your program has the right to appeal the ranking of initiatives.

If you choose to appeal, please complete the form that explains and supports your position. The appeal will be handled at the next higher level of the program review process.

## 7B: Process Assessment

In this first year of program review using the new format, programs will be establishing performance indicators (goals) for analysis next year. Program review will take place annually, but until programs have been through an entire annual cycle, they cannot completely assess the process. However, your input is very important to us as we strive to improve, and your initial comments on this new process are encouraged.
