

Dear Mrs. Cogert

I'm so honored to have received the Classified Senate Scholarship. This scholarship means a lot to me because it allows me to pursue my educational goals. For years, I have struggled with paying for school and being a child with a single parent makes it even more difficult. This past year I was let go from my job and this allows me to stop stressing about funds and to finish the classes I need for my degree. This also relieves my mother of having to pull together money to help me pay for school, she thanks you as well. This really does mean a lot to me because it will allow me to continue on to something amazing.

Currently, I am a Ventura College Graduate holding an AA in Criminal Justice and an AA in General Liberal Arts. I plan on transferring to CSUCI or UCSB and obtaining a degree in biochemistry. I have a love for the sciences that cannot be matched by anything. I hope to work for Amgen during my junior and senior year; they offer a great internship that is right up my alley. After my bachelors I plan on continuing my education and working to get a masters degree

Again, this scholarship means a lot to me. It allows me to continue on with my goals of a higher education. The fact that you were willing to help someone you didn't know says so much about your kindness and concern for the education of my generation.

Sincerely,

Alexandra Mundy
