**What other library services or resources would you like to see offered for you or your students?**

I'd love to have a personal librarian for my department where faculty can develop long-term relationships with someone so there is more use of the librarians in our courses.

Thank you for your really hard work to support the students and campus. It shows.

This is not for the library but for the bookstore. I don't use traditional textbooks in any of my classes. I don't understand why I have to continue certifying textbooks every semester when I don't ever use traditional textbook. Not only is the bookstore website a complete disaster, but I have to find my login info each semester in order to get in and then go class by class to say no textbook. It is a complete waste of my time.

We lost Hoopla, are we going to get another virtual lending service?

Easier access to online academic article databases

The entire library staff is very helpful. I really like the idea of the locker system that was implemented last year.

**What other library services or resources would you like to see offered for you or your students?  
(continued)**

More Zero Cost Textbooks, the ability for more students to be served through the Semester Textbook Lending Library

Pre made Canvas shells that integrate VC library resources

Access to all PBS documentaries (NOVA and Frontline)

More information on how to access the library at this time than I've been gives.

I WANT MY LIBRARY BACK!!!

I want to go inside and be able to check out books again! No guarantees that when I get in there I'll eventually leave, because it's been so long!

My ranking for the libraries that I use in Ventura County is:

- 1) VC Library
- 2) Ojai Library (not as often, but I always keep it in mind, as it feels like a wood-paneled reading room without the wood paneling)
- 3) E.P. Foster Library in downtown Ventura.

I just want to be there again! I want to be able to dash upstairs again during CSU Long Beach's break, return what I've read, and check out more!

I think the library has done a tremendous job converting all resources to online and remote. They are still providing physical materials to students using a contactless locker system. Students have been very appreciative of this system.
