### About Us

(/about/overview)

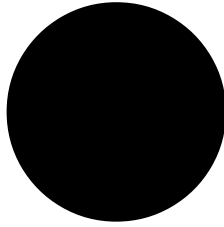

We facilitate and coordinate the work of systemwide technology.

### Adopt Our Tech

(/services/how-to-adopt)

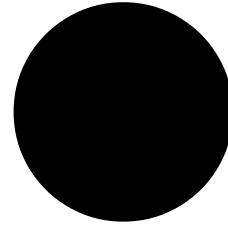

From connectivity to student services and educational technology.

### **Connecting Colleges**

(/projects/cenic)

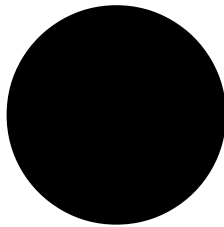

Gigabit fiber optic network for all of our colleges.

### **Information Security**

(/projects/information-security)

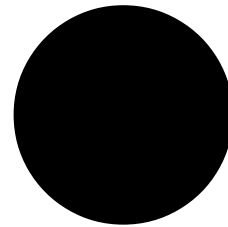

Training, monitoring, and no-cost tools to protect students and educators.

### **Accessibility**

(/projects/accessibility-center)

Training and resources to make tech accessible to users with disabilities.

### **Events**

(/resources/upcoming-events)

Upcoming CCC Technology Center workshops and webinars.

## About the Technology Center

The California Community Colleges Technology Center, hosted by Butte College, facilitates and coordinates the work of systemwide technology. Our 25-year history of collaboration with the Chancellor's Office and community colleges throughout the state has resulted in great strides forward for the system in areas including federated identity, application architecture, networking, and student services.

We operate under the Gartner model of "Run, Grow, Transform" to simplify our portfolio of services and prioritize resources in support of ongoing operations, the next phase of growth, and longer term transformative innovation.

## Top Stories

(<https://digitalfutures.cccco.edu/News/May-2022/Get-Ready-for-SuperGlue>).

### Get Ready for SuperGlue

As of July 1, 2022, any new CCCApply student application data will be delivered via SuperGlue only as the Download Client is phased out. Be sure you're set-up for real-time delivery of student application data and bidirectional data sharing.

## System Use of the CCCID

While the CCCID provides students with a secure, single sign-on to various cloud-based applications, it is also an effective tool for colleges, districts, and the Chancellor's Office to track students' non-linear journeys which often span multiple colleges.

## **CENIC: Expanding Internet Access Across California**

CENIC was named as the third-party administrator responsible for developing the fiber network and creating rural exchange points for California's historic broadband legislation known as the Middle Mile Broadband Initiative (SB 156).
