## Spring 2023 Faculty Academy Evaluation

The Faculty Academy (FA) is a two-semester-long pedagogical training program. To date, seven cohorts of faculty have completed it. Analyses were conducted to evaluate the effect of FA participation on course success rates.

## FA Faculty and Students

A total of 58 full-time faculty members have participated across the seven cohorts. During their participation, they taught a total of 12,275 students in 31 different disciplines.

| Cohort | Faculty <br> Participants | Unduplicated <br> Students |
| :--- | ---: | ---: |
| Spring/Fall 2015 | 11 | 3,303 |
| Spring/Fall 2016 | 8 | 2,287 |
| Spring/Fall 2017 | 11 | 2,659 |
| Spring/Fall 2018 | 8 | 1,663 |
| Spring/Fall 2020 | 7 | 1,662 |
| Spring/Fall 2021 | 8 | 1,352 |
| Spring/Fall 2022 | 5 | 1,329 |
| Total | 58 | 12,275 |

*Notes - Some faculty participated in multiple cohorts. The data above only includes their first participation. Unduplicated student count only includes students in instructional classes. Noninstructional faculty participated in FA (i.e. counselors, librarians, athletic director), but due to inconsistent data collection systems, it is not possible to determine how many students these faculty met with in non-instructional sessions. The total unduplicated student count is less than the sum of cohorts because some students were in FA participant classes in multiple years.

Disciplines taught by FA Faculty:

1. American Ethnic Studies
2. Anatomy
3. Anthropology
4. Biology
5. Biotechnology
6. Business
7. Child Development
8. Chemistry
9. Chicano Studies
10. Criminal Justice
11. Communication Studies
12. Computer Science
13. Counseling
14. English
15. English as a Second Language
16. Engineering
17. Environmental Science and Resource Management
18. Geography
19. Geology
20. Geographic Information Systems
21. Health Education
22. History
23. Kinesiology
24. Math
25. Microbiology
26. Philosophy
27. Physiology
28. Political Science
29. Psychology
30. Sociology
31. Spanish

## VENTURACOLLEGE

## Course Success Rate Analysis - All Cohorts

To evaluate the effect of FA participation on course success rates, independent sample $t$-tests were conducted. Analyses were limited to courses that participants taught in both the semester prior to participation, and in the second semester of participation. This ensured that any differences were not due to participants teaching different courses before and after FA participation. Analyses also excluded four FA participants who did not teach in the semester prior to FA participation.

The results indicated that there was a statistically significant increase in the course success rate between the semester prior to FA participation and the second semester of FA. Disaggregated analyses indicated that there were also significant increases for Hispanic, female, male, low-income, and EAC students.

## Course Success Rates in Faculty Academy Participants' Classes

Course Success Rates in FA Participants' Classes - Additional Student Groups

[^0]Course Success Rates in FA Participant Classes

|  | Semester Prior to Faculty <br> Academy | Second Semester of <br> Faculty Academy |  |  |
| :--- | ---: | ---: | ---: | ---: |
|  | N | Course <br> Success Rate | N | Course <br> Success Rate |
| Asian Students | 307 | $79.2 \%$ | 284 | ${ }^{*} 84.9 \%$ |
| Black Students | 213 | $60.1 \%$ | 155 | ${ }^{*} 71.0 \%$ |
| Hispanic Students | 4,768 | $68.5 \%$ | 4,439 | ${ }^{*} 72.4 \%$ |
| White Students | 1,797 | $77.8 \%$ | 1,591 | $79.0 \%$ |
| Female Students | 4,319 | $72.4 \%$ | 3,960 | ${ }^{*} 75.4 \%$ |
| Male Students | 3,141 | $69.4 \%$ | 2,773 | ${ }^{*} 73.6 \%$ |
| Low-Income Students | 4,950 | $70.3 \%$ | 4,436 | ${ }^{*} 73.8 \%$ |
| EAC Students | 421 | $63.2 \%$ | 382 | ${ }^{*} 74.9 \%$ |
| All Students | 7,563 | $71.3 \%$ | 6,851 | $* 74.6 \%$ |

Data Notes and Definitions:

- Course Success Rate $=\%$ of $A, B, C$, and $P$ grades out of all grades assigned (W's are included. EW's are excluded).
- $\quad$ = Statistically significant difference in success rate compared to the semester prior to faculty academy.
- $\quad N=$ number of grades assigned. If a single student received a grade in 3 classes, this student would count as $\mathrm{N}=3$.
- Native Americans, Pacific Islanders, two or more ethnicities, unreported ethnicities, and unreported gender are not displayed due to very small sample sizes.
- Low-income students = students who received a Board of Governors Fee Waiver.
- Data are only included for courses that were taught by FA Participants in both the semester prior to FA and the second semester of FA.

## Course Success Rate Comparison between FA and Non-FA Instructors - All Cohorts

Additional independent sample $t$-tests were conducted to compare course success rates between FA participants and Non-FA participants who taught the same courses. Analyses excluded FA participants who did not teach in the semester prior to FA participation.

The results indicated that, in the semester before participation, there was no difference in the overall success rate between FA and Non-FA participants' classes. However, at the end of the second semester of FA, FA participants had significantly higher course success rates than Non-FA instructors who taught the same courses. Disaggregated analyses found same statistically significant pattern for nearly all demographic groups.

Course Success Rates in FA and Non-FA Participants' Courses

|  | Semester Prior to Faculty Academy |  | Second Semester of Faculty Academy |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Non-FA <br> Participants | FA <br> Participants | Non-FA <br> Participants | FA <br> Participants |
| Asian Students | 77.2\% | 79.2\% | 78.3\% | *84.9\% |
| Black Students | 65.4\% | 60.1\% | 65.3\% | 71.0\% |
| Hispanic Students | 68.2\% | 68.5\% | 68.6\% | *72.4\% |
| White Students | 75.7\% | *77.8\% | 76.7\% | *79.0\% |
| Female Students | 71.9\% | 72.4\% | 73.0\% | *75.4\% |
| Male Students | 68.8\% | 69.4\% | 68.7\% | *73.6\% |
| Low-Income Students | 70.0\% | 70.3\% | 70.3\% | *73.8\% |
| EAC Students | 67.9\% | *63.2\% | 69.1\% | *74.9\% |
| All Students | 70.5\% | 71.3\% | 71.1\% | *74.6\% |

Notes and Definitions

-     * = Statistically significant difference in course success rate between Non-FA Participants and FA Participants.
- Course Success Rate $=\%$ of $A, B, C$, and $P$ grades out of all grades assigned (W's are included. EW's are excluded).
- Native Americans, Pacific Islanders, two or more ethnicities, unreported ethnicities, and unreported gender are not displayed due to very small sample sizes.
- Low-income students = students who received a Board of Governors Fee Waiver.
- Data are limited to courses taught by both FA Participants and Non-FA participants.

## Course Success Rate Analysis - Covid-Impacted Cohorts

The effects of Covid-19 on higher education cannot be understated. In spite of the massive disruptions to the lives of faculty and students, the faculty academy continued to meet during the pandemic. However, it was changed from an in-person format to a remote format, and meetings were held less frequently.

Due to the unprecedented nature of the pandemic, additional analyses were conducted to compare this period of the faculty academy to pre-pandemic cohorts. There were a few key findings of these analyses:

1. The Covid-impacted FA cohorts were markedly smaller than pre-pandemic FA cohorts, both in the number of faculty participating and in the number of students in their classes (see the table on page 1).
2. There was not a statistically significant increase in overall course success rates for FA participants between the semester prior to FA participation and the second semester of FA, as there was in pre-pandemic cohorts.
3. The faculty who participated in FA during the pandemic had higher course success rates prior to their FA participation than non-FA instructors who taught the same courses.
4. FA Participants also had higher course success rates in the second semester of FA than non-FA participants who taught the same classes. To determine if this was due to their higher pre-FA course success rates, or to the impact of FA, regression analyses were conducted (not displayed

## VENTURACOLLEGE

below). These analyses found that after controlling for pre-FA course success rates, the effect of FA was not a significant predictor of the second-semester course success rate.
5. In spite of this lack of an overall effect, success rates for some demographic groups (i.e. Black, Asian students) did increase significantly in FA participants' classes during their participation.

Course Success Rates in FA and Non-FA Participants' Classes

|  | Rates in Pr | ovid Faculy | Academy C |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Semester Prior to Faculty Academy |  | Second Semester of Faculty Academy |  |
|  | Non-FA <br> Participants | $\begin{array}{r} \text { FA } \\ \text { Participants } \\ \hline \end{array}$ | Non-FA Participants | $\begin{array}{r} \text { FA } \\ \text { Participants } \\ \hline \end{array}$ |
| Asian Students | 76.7\% | 79.9\% | 78.5\% | *83.8\% |
| Black Students | 67.1\% | 60.3\% | 68.4\% | 71.4\% |
| Hispanic Students | 68.8\% | 67.5\% | 69.3\% | *73.2\% |
| White Students | 76.1\% | 77.1\% | 77.4\% | 79.1\% |
| Female Students | 72.2\% | 72.2\% | 73.7\% | *75.5\% |
| Male Students | 69.9\% | 68.9\% | 69.7\% | *75.3\% |
| Low-Income Students | 70.7\% | 69.7\% | 71.3\% | *74.8\% |
| EAC Students | 68.0\% | *59.2\% | 68.7\% | *74.0\% |
| All Students | 71.1\% | 70.9\% | 71.9\% | *75.4\% |

| Course Success Rates in Covid-Impacted Faculty Academy Cohorts |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Semester Prior to Faculty Academy |  | Second Semester of Faculty Academy |  |
|  | Non-FA Participants | $\begin{array}{r} \text { FA } \\ \text { Participants } \\ \hline \end{array}$ | Non-FA Participants | $\overline{\mathrm{FA}}$ <br> Participants |
| Asian Students | 79.1\% | 77.8\% | 77.4\% | *87.1\% |
| Black Students | 58.1\% | 59.7\% | 53.9\% | *70.3\% |
| Hispanic Students | 66.3\% | *70.3\% | 66.0\% | *70.9\% |
| White Students | 74.1\% | *79.6\% | 73.7\% | *78.8\% |
| Female Students | 70.9\% | 72.5\% | 70.6\% | *75.2\% |
| Male Students | 64.9\% | *70.6\% | 64.7\% | *70.1\% |

| EAC Students | 67.7\% | 71.5\% | 71.8\% | 76.4\% |
| All Students | 68.3\% | *72.0\% | 68.2\% | *73.2\% |

## VENTURACOLLEGE

## General Conclusions

When the results are examined across all seven cohorts, they indicate that Faculty Academy participation has a statistically significant positive effect on course success rates. Disaggregated analyses suggest that this effect is particularly evident in student groups that have been traditionally underserved by higher education (i.e. Hispanic students, male students, low-income students, and EAC students).

Analyses also indicate that the Faculty Academy was not immune to the devastating impact of Covid-19 on our community. During the pandemic, the Faculty Academy was successful in improving course success rates for some student groups (i.e. Black, Asian students). However, there wasn't the same level of overwhelmingly positive improvements across the board, as had been observed in pre-pandemic cohorts.

Further evaluations will be conducted on future cohorts to see if the effectiveness of the Faculty Academy returns to pre-pandemic levels. Further, we need to identify ways to evaluate its effectiveness for non-instructional faculty. More counselors and librarians have participated in recent cohorts, but we have been unable to measure the effects of the Faculty Academy for these faculty members because of limitations in our data collection mechanisms.

[^0]:    *Difference is statistically significant
